EXPERIMENT RECORD

Name	TAMMINA USHASRI
Roll No	A24126552120
Branch	CSM
Section	B
Subject	FS

Experiments Included: 01 to 04

EXPERIMENT NO: 01

Title: Creating a College Information Portal using Basic HTML Tags

1. Objective / Aim

To design and implement a basic college information portal using HTML headings, paragraphs, text formatting, lists, and hyperlinks.

2. System Requirements

Hardware: Core i5 processor or equivalent, 8 GB RAM, and sufficient storage.

Software: Windows 10/11, Visual Studio Code, and Google Chrome or any modern web browser.

3. Architecture / Design

User → HTML Web Page → Browser → Display College Information, Lists, and Links

4. Source Code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>College Information Portal</title>
</head>

<body>

  <!-- College Heading -->
  <h1>Anil Neerukonda Institute of Technology and Sciences (ANITS)</h1>

  <!-- College Information -->
  <p>
    Anil Neerukonda Institute of Technology and Sciences (ANITS) is
    an engineering college located at Sangivalasa, Visakhapatnam.
    The college provides quality education in Engineering and Technology.
  </p>

  <!-- Text Formatting -->
  <h2>Text Formatting</h2>

  <p>
    <b>ANITS College</b> - Bold Text<br>

    <i>Quality Education</i> - Italic Text<br>

    <u>Engineering and Technology</u> - Underlined Text<br>

    Water Formula:  $H_2O$ <br>
```

```

        Mathematical Formula:  $x^2 + y^2 = z^2$ 
    </p>

    <!-- Ordered List -->
    <h2>Courses Offered</h2>

    <ol>
        <li>Computer Science and Engineering</li>
        <li>Computer Science and Engineering - Artificial Intelligence</li>
        <li>Artificial Intelligence and Machine Learning</li>
        <li>Electronics and Communication Engineering</li>
        <li>Electrical and Electronics Engineering</li>
    </ol>

    <!-- Unordered List -->
    <h2>College Facilities</h2>

    <ul>
        <li>Library</li>
        <li>Computer Laboratories</li>
        <li>Sports Facilities</li>
        <li>Hostel Facilities</li>
        <li>Transportation</li>
    </ul>

    <!-- Hyperlinks -->
    <h2>Useful Links</h2>

    <a href="https://anits.edu.in" target="_blank">
        Visit ANITS Official Website
    </a>

    <br><br>

    <a href="https://www.google.com" target="_blank">
        Visit Google
    </a>

</body>
</html>

```

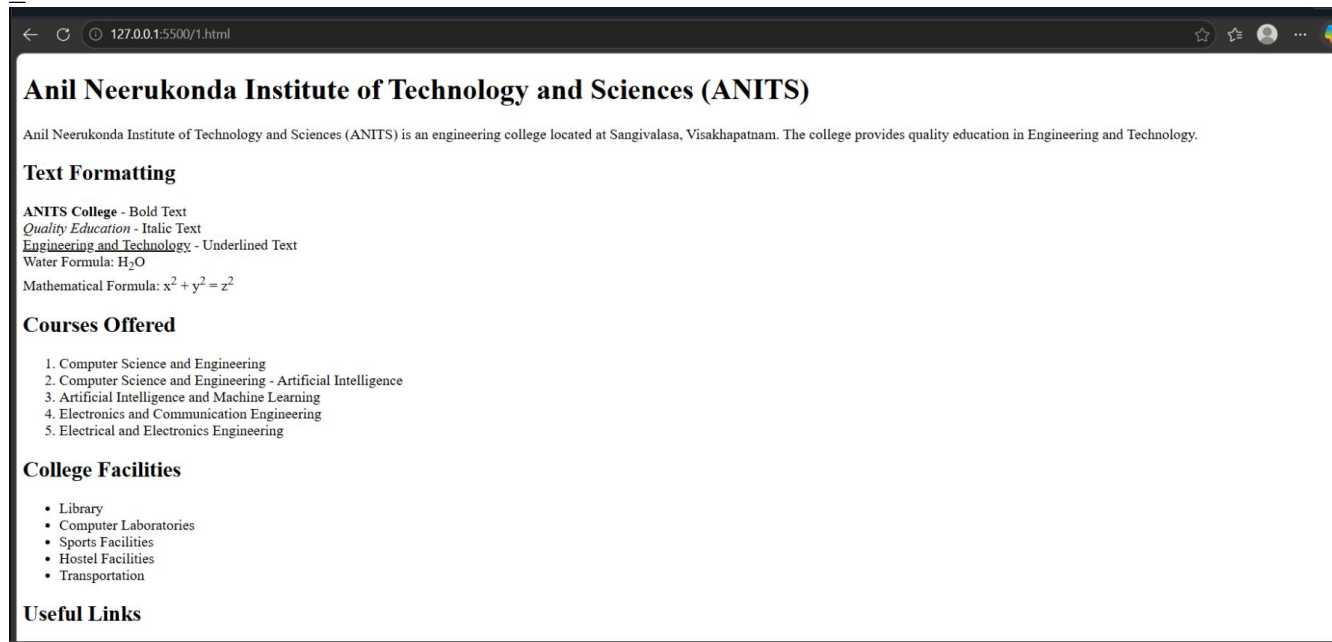

5. Compilation / Execution Steps

1. Create a file named index.html.
2. Open the file in Visual Studio Code and enter the given HTML code.
3. Save the file.
4. Open index.html in Google Chrome.
5. Verify the college information, text formatting, lists, and hyperlinks.

6. Expected Output / Screenshots

The browser displays the ANITS college information portal with formatted text, ordered and unordered lists, and working hyperlinks.

Screenshot:

7. Result / Conclusion

The basic College Information Portal was successfully created and tested using HTML.

EXPERIMENT NO: 02

Title: Creating a College Information Page using Images and Tables

1. Objective / Aim

To create a college information webpage using HTML images and tables for presenting visual and tabular data.

2. System Requirements

Hardware: Core i5 processor or equivalent, 8 GB RAM, and sufficient storage.

Software: Windows 10/11, Visual Studio Code, and Google Chrome or any modern web browser.

3. Architecture / Design

User → HTML Web Page → Browser → Images + Student Details Table

4. Source Code

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>College Information Portal - Tables and Images</title>
</head>

<body>

  <!-- College Information -->
  <h1>Anil Neerukonda Institute of Technology and Sciences</h1>

  <p>
    ANITS is located at Sangivalasa, Visakhapatnam.
    It provides quality education and various facilities
    for students.
  </p>

  <!-- College Logo -->
  <h2>College Logo</h2>

  <!-- College Campus Image -->
  <h2>College Campus</h2>

  
```

```

width="500">

<!-- Student Details Table -->
<h2>Student Details</h2>

<table border="1" cellpadding="10" cellspacing="0">

    <tr>
        <th>Roll No</th>
        <th>Name</th>
        <th>Branch</th>
        <th>Email</th>
    </tr>

    <tr>
        <td>01</td>
        <td>Usha</td>
        <td>CSE</td>
        <td>usha@example.com</td>
    </tr>

    <tr>
        <td>02</td>
        <td>Rahul</td>
        <td>ECE</td>
        <td>rahul@example.com</td>
    </tr>

    <tr>
        <td>03</td>
        <td>Priya</td>
        <td>AIML</td>
        <td>priya@example.com</td>
    </tr>

    <tr>
        <td>04</td>
        <td>Kiran</td>
        <td>EEE</td>
        <td>kiran@example.com</td>
    </tr>

</table>

</body>

</html>

```

5. Compilation / Execution Steps

1. Create a file named index.html.
2. Place anits-logo.png and anits-campus.jpg in the same folder as the HTML file.
3. Open the HTML file in Visual Studio Code and enter the given code.
4. Save the file and open it in Google Chrome.

5. Verify the displayed images and student details table.

6. Expected Output / Screenshots

The browser displays the college information, college logo, campus image, and a student details table.

Anil Neerukonda Institute of Technology and Sciences

ANITS is located at Sangivalasa, Visakhapatnam. It provides quality education and various facilities for students.

Student Details

Roll No	Name	Branch	Email
01	Usha	CSE	usha@example.com
02	Rahul	ECE	rahul@example.com
03	Priya	AIML	priya@example.com
04	Kiran	EEE	kiran@example.com

7. Result / Conclusion

The college information webpage with images and tabular student data was successfully created and tested.

EXPERIMENT NO: 03

Title: Creating a Student Registration Form using HTML

1. Objective / Aim

To design and implement a student registration form using HTML form controls such as text fields, radio buttons, checkboxes, select lists, and text areas.

2. System Requirements

Hardware: Core i5 processor or equivalent, 8 GB RAM, and sufficient storage.

Software: Windows 10/11, Visual Studio Code, and Google Chrome or any modern web browser.

3. Architecture / Design

User → Registration Form → Input Controls → Submit / Reset

4. Source Code

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Student Registration</title>
</head>

<body>

    <h1>Student Registration Form</h1>

    <form>

        <!-- Name, Email and Password -->
        Name:
        <input type="text" name="name" required><br><br>

        Email:
        <input type="email" name="email" required><br><br>

        Password:
        <input type="password" name="password"><br><br>

        <!-- Gender -->
        Gender:
        <input type="radio" name="gender" value="Male"> Male
        <input type="radio" name="gender" value="Female"> Female
        <br><br>

        <!-- Hobbies -->
        Hobbies:
        <input type="checkbox" name="hobby"> Reading
```

```
<input type="checkbox" name="hobby"> Sports  
<input type="checkbox" name="hobby"> Music  
<br><br>
```

```
<!-- Branch -->  
Branch:  
<select name="branch">  
    <option>CSE</option>  
    <option>AIML</option>  
    <option>ECE</option>  
    <option>EEE</option>  
</select>  
<br><br>
```

```
<!-- Comments -->  
Comments:  
<br>  
<textarea rows="4" cols="35"></textarea>  
<br><br>
```

```
<input type="submit" value="Submit">  
<input type="reset" value="Reset">
```

```
</form>
```

```
</body>
```

```
</html>
```

5. Compilation / Execution Steps

1. Create a file named registration.html.
2. Open the file in Visual Studio Code and enter the given HTML code.
3. Save the file.
4. Open registration.html in Google Chrome.
5. Enter sample details and test the Submit and Reset controls.

6. Expected Output / Screenshots

The browser displays a Student Registration Form containing name, email, password, gender, hobbies, branch, comments, Submit, and Reset controls.

Screenshot:

Comments:

7. Result / Conclusion

The Student Registration Form was successfully created and tested using HTML form elements.

EXPERIMENT NO: 04

Title: Creating a College Information Portal using HTML5 Semantic Elements and Media

1. Objective / Aim

To develop a college information portal using HTML5 semantic elements, input types, audio, video, and navigation links.

2. System Requirements

Hardware: Core i5 processor or equivalent, 8 GB RAM, and sufficient storage.

Software: Windows 10/11, Visual Studio Code, Google Chrome or any modern web browser.

3. Architecture / Design

User → HTML5 Portal → Semantic Sections + Input Controls + Audio/Video → Browser Output

4. Source Code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>College Information Portal</title>
</head>

<body>

  <!-- Semantic Elements -->
  <header>
    <h1>ANITS College Information Portal</h1>
  </header>

  <nav>
    <a href="#home">Home</a> |
    <a href="#about">About</a> |
    <a href="#media">Media</a>
  </nav>

  <section id="home">
    <h2>Welcome to ANITS</h2>

  <input type="color"><br><br>

  Interest:
  <input type="range" min="0" max="10">
</section>

<!-- Audio and Video -->
<section id="media">
  <h2>College Media</h2>

  <audio controls>
    <source src="college-audio.mp3" type="audio/mpeg">
  </audio>

  <br><br>

  <video width="400" controls>
    <source src="college-video.mp4" type="video/mp4">
  </video>
</section>

<footer>
  <p>&copy; 2026 ANITS College Information Portal</p>
</footer>

</body>
</html>

```

5. Compilation / Execution Steps

1. Create a file named index.html.
2. Place college-audio.mp3 and college-video.mp4 in the same folder as the HTML file.
3. Open the HTML file in Visual Studio Code and enter the given code.
4. Save the file and open it in Google Chrome.
5. Test the navigation links, HTML5 input controls, audio, and video.

6. Expected Output / Screenshots

The browser displays the ANITS portal with header, navigation links, home and about sections, HTML5 input controls, audio, video, and footer.
